WHAT'S COMING !

Next IVRC meeting Nov. 4th at the Eureka Bank in LaSalle. 7:30 PM. Bring some show&tells if you have them !

Swap to keep in mind. Feb 27th - 2010 at St. Charles. Location - Kane County Fair Grounds, St Charles, IL.

WHAT'S HAPPENED !!

Summer has gone south for the winter, that's what !! The breakfast at the Peru Airport has come and gone. Our annual picnic is history. Had a good turn out. If you went away hungry it was your own fault. A big thanks to Larry K. for taking care of getting the chicken, slaw, and potato salad. More thanks to those who brought the side dishes and desserts. Jim didn't take credit so a thanks to Becky for the side of spaghetti. It hit the spot along with the chicken ! Was a bit chilly out in the wind, but a few braved the wind and got a flight in. Bob Schmidt was tearing up the sky with his "Hot Dog" Tower Kaos ! Andy had the Witch out a couple weeks early for Halloween. Tried a new wrinkle to get her up in the wind, Joe hand launched her.

Was quite a stunt, but it worked. She didn't like the wind blowing up her skirt though. He had his hands full !! To top it all off, her broom ran out of "Zoom" and she tried to escape into the corn field, but Andy caught up with her !!

I know, same pictures I had on my web page, but I only have so many !

John L. was zippin around with his little Blade heli. Was doing OK considering the wind. I made the mistake of letting him fly my bigger T-Rex heli at the Dusters fun-fly a few weeks ago. Big "weenie" can fly it better than I can ! Now he is in the process of putting together a T-Rex "clone". Is a Chinese copy at a fraction of the price of the real T-Rex ! I have one too and it flies as good as the original.

Here's to drive you nuts ! I ordered servos for it along with from Nitroplanes. I ordered another knowing someone I know might want it or I could use it for parts. Ordered the same servos. For Something to do, let's go ahead and put it together. They should be identical, right ?? Everything was backwards ! Ail, Elv, & pitch all was reversed.. The second batch of EXI servos were reversed in direction. Same stock number etc. When I finally figured out what was up all I had to do was reverse Ch- 1, 2, and 6 and all was OK , except for the head ache from trying to figure out what was up !!

Lets get to the minutes of the Oct meeting so I'm sure to not run out of room. Really don't have much of any more news anyway.

Jim will try for the 9th with the 16th as a alternate. They want at least 30 people to reserve a private room so will need t have a head count as to who and how many will plan to attend. The date will be posted on our website.
